Joint Training Information Management System (JTIMS)

User Advisory Group (UAG) Meeting

LTC Daniel Ray
Joint Staff J7/JETD
JTIMS Program Manager
20 March 2012

JTIMS UAG Agenda

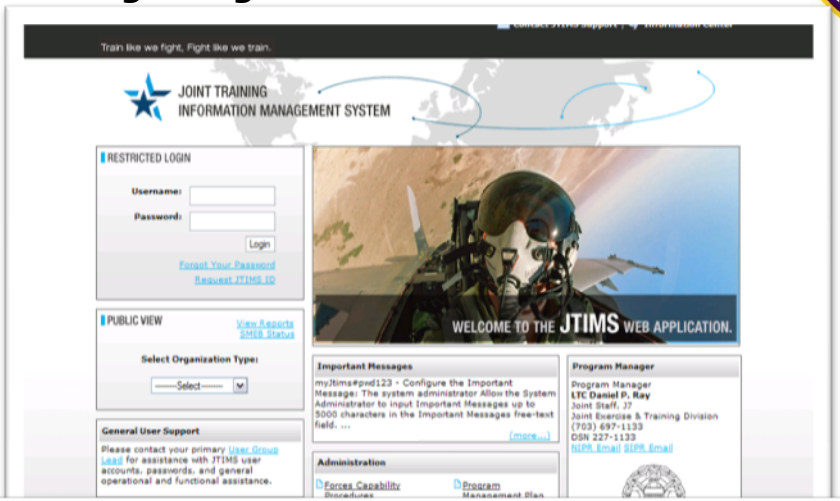
1300 - 1330	Welcome - Program Update - Near-term Development Efforts - Long-term Strategic Plan	LTC Dan Ray
1330 - 1400	v7.2 Capability Review/Scope	Jane Ward
1400 - 1430	Business Rules - Security Classification - Subordinate Events (TO's & Forces) - Force Requests	Jane Ward
1430 - 1500	JTIMS JMSEL	Dennis Coombs
1500 - 1530	JTIMS JMSEL Strategic Migration - JTIMS Enterprise - JTIMS Lite	LTC Dan Ray/Jane Ward
1600 - 1630	Stakeholder Open Forum	LTC Dan Ray
1630 – 1700	JTIMS Issue Deck/Closing Comments	LTC Dan Ray

JTIMS supports the Joint Training System (JTS)

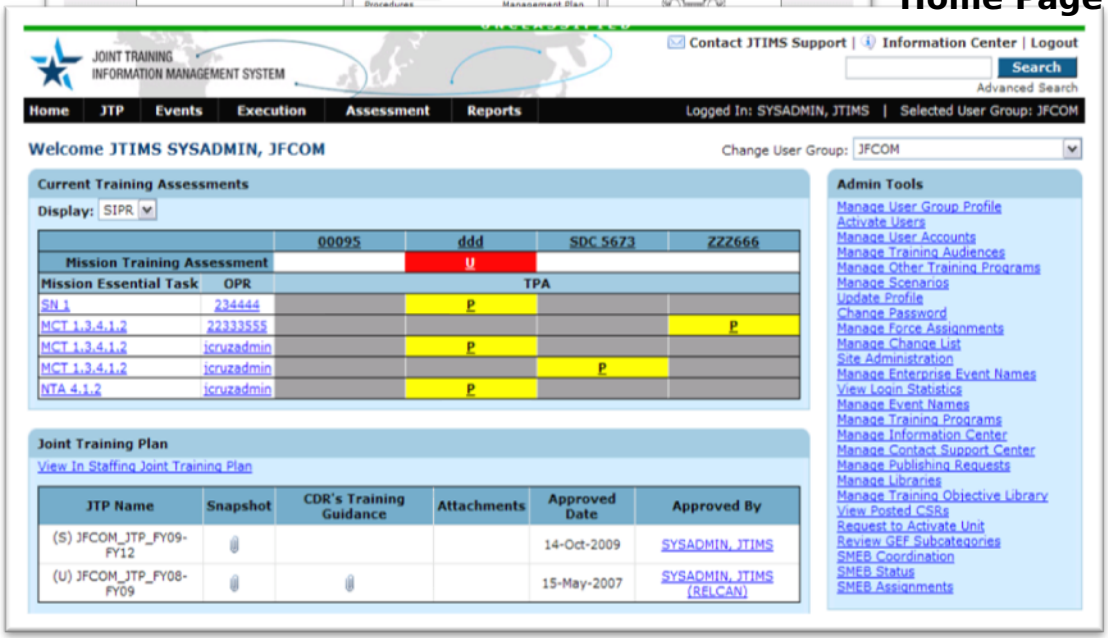
KEY FACTS

- **Key Stakeholders – COCOMs, CSAs, JS, OSD, NGB, Services, Coalition Partners**
- **Enables/Enhances the four phases of the JTS – Requirements, Plans, Execution, and Assessment**
- **Over 5,000 unique users**
- **Over 4,500 Joint Training Events managed**
- **"Enterprise version" available on the SIPRNet and NIPRNET**
- **Offline version available to support disconnect scenarios – JTIMS Lite**

JTIMS Login Page



JTIMS Home Page



JTIMS Data Integrations

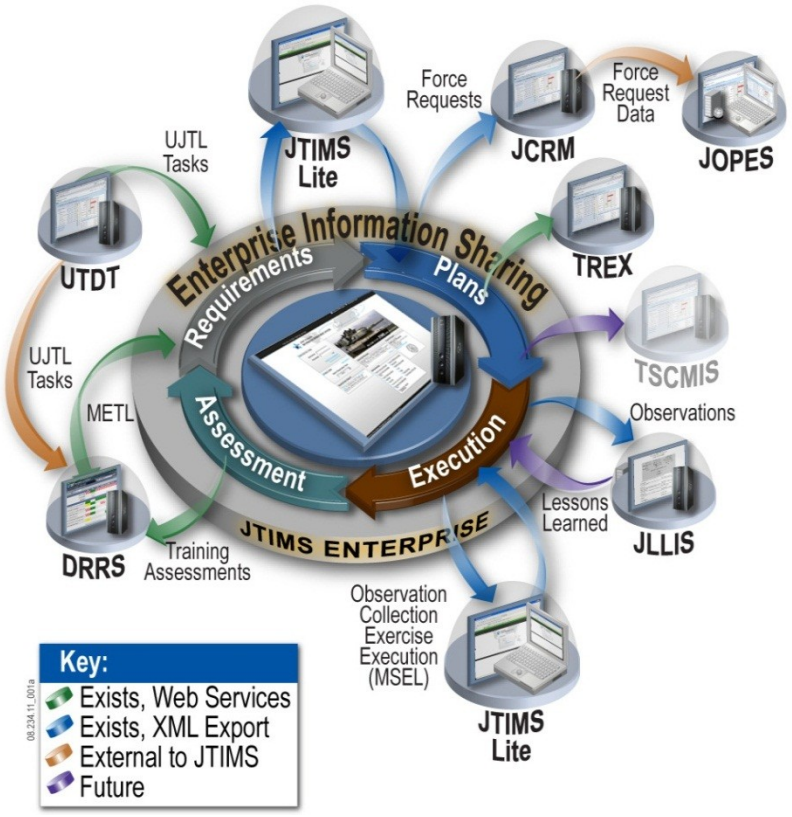
KEY INTEGRATIONS

- **DRRS – consume METL; share training assessments**
- **JCRM – share force requests**
- **UTDT – consume UJTL tasks**
- **JLLIS – share observations; search lessons learned**
- **TREX –share Event and TO data**

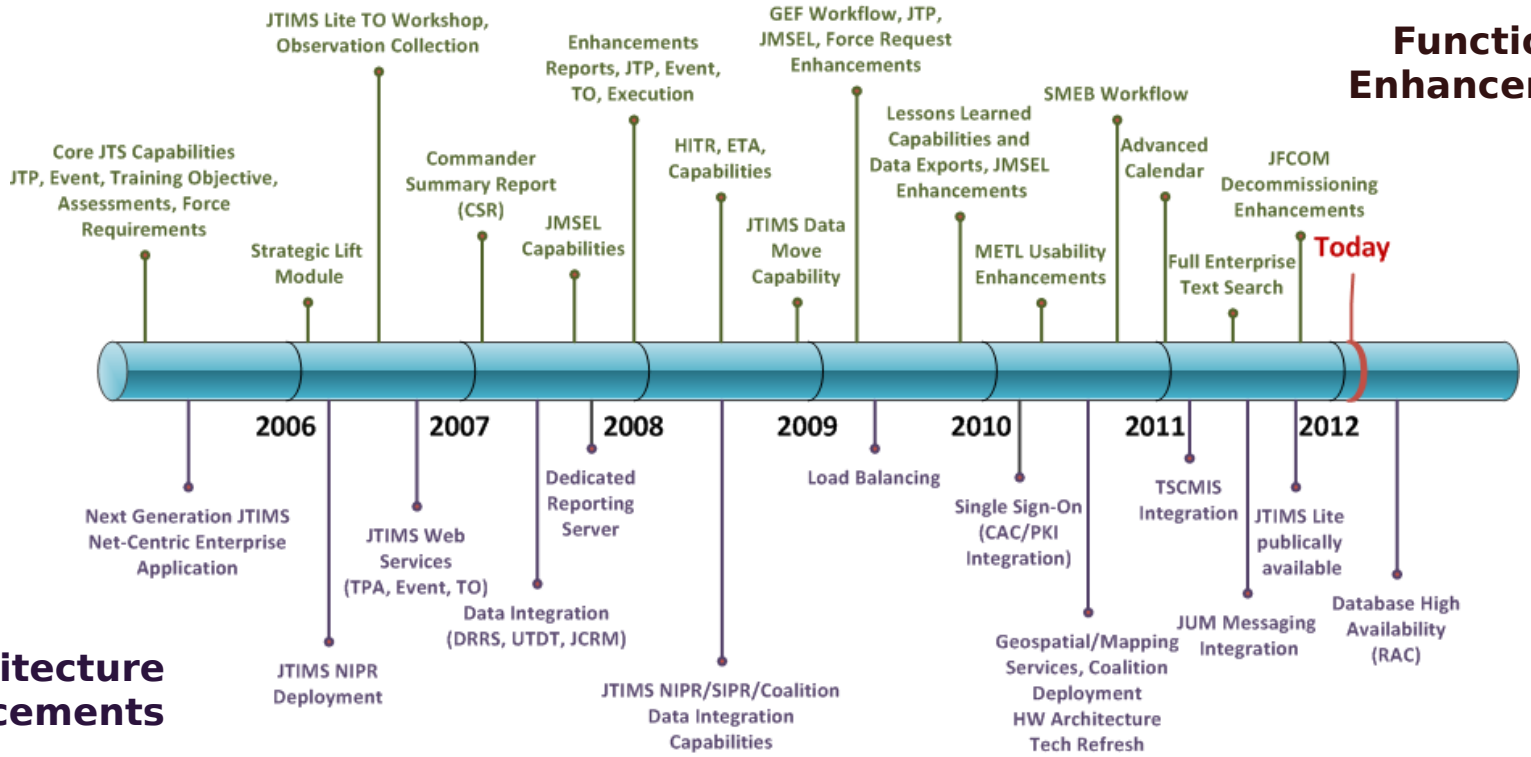
INTEGRATION BENEFITS

- **Duplicate data entry eliminated**
- **Enhanced data quality for reports**

JTIMS System-of-Systems Integrations



JTIMS Near-term Development Timeline



Since 2005, significant strides have been made in achieving the program goals of an enterprise Net-Centric JTIMS application providing data visibility/integration, an integrated set of joint training tools, and global availability on both NIPR and SIPR environments.

JTIMS Mission and Technical Benefits

MISSION BENEFITS

- Supports full end-to-end lifecycle of the JTS capturing critical information (such as training effectiveness, lessons learned, and exercise funding information)
- Responsive to COCOM and Joint Staff functional needs to enhance JTS
- Visibility into all Joint Training Exercises for awareness and effectiveness
- Actionable data for decision support and continuous training improvements

TECHNICAL BENEFITS

- Cost savings through use of open source technologies
- Re-usable enterprise components based on open source technologies (full text search, messaging integration, report generation, advanced calendar tool)
- Thought leadership with IA Certification and Accreditation (C&A) process for open source technologies

STAKEHOLDER BENEFITS

- JTIMS supports: Joint C2 HD/Civil Support Exercises; COCOM Exercises, Combating WMD training; and Security Cooperation/ Engagement.
- JTIMS is the software suite that fully supports and implements the four phases of the JTS.
- Enables key CJCS Title 10 responsibilities; T2 guidance, & warfighters' joint training responsibilities.
- Integrated with readiness and training systems: DRRS, Force Management Integration Project, UJTL, JLLIS, TSCMIS, and Service systems.

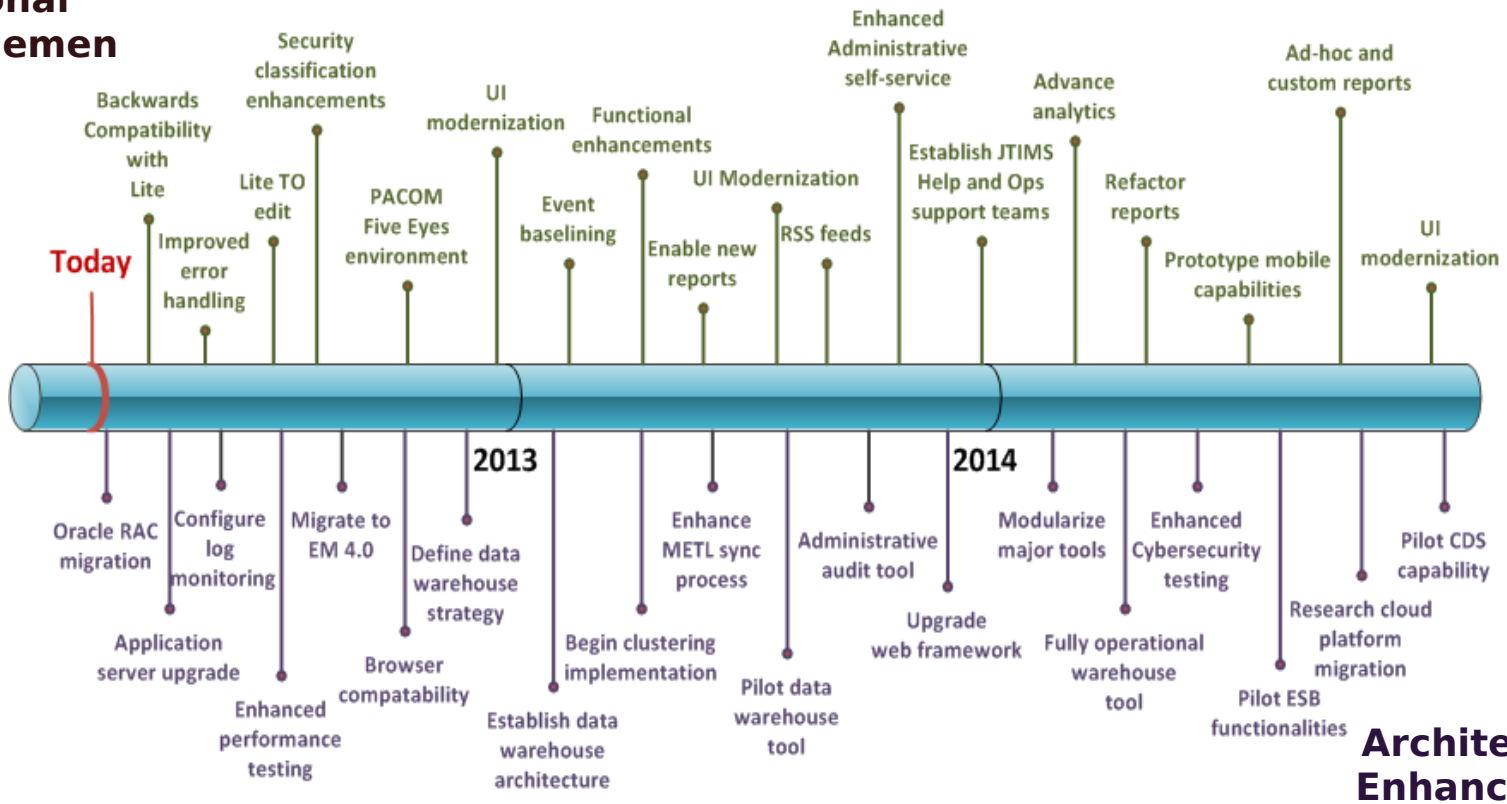
Focus Areas over the next 3 years

- **Improve system performance and reliability through the implementation of advanced monitoring tools and focus on refactoring core components**
- **Provide enhanced real-time data visibility and additional integration partners**
- **Focus on data initiatives starting in Year 2 will be important as the information collected by JTIMS is exponentially growing and will require capabilities to turn data into actionable information**
- **Enhance infrastructure and architecture**
  - Deploy Five Eyes instance
  - Implement clustered application and DB servers
  - Refactor code as part of scheduled maintenance
- **Enhance user experience**
  - Refresh user interface for usability and better self service to decrease overall support
  - Continue implementation of user requests – enhancements and new functionality
- **Three year plan includes activities scheduled for 7.2 release**

Strategic enhancements will enable more effective and efficient support to the DoD Training Transformation initiative while ensuring our Warfighters are ready for live missions

Future JTIMS Strategic Initiatives

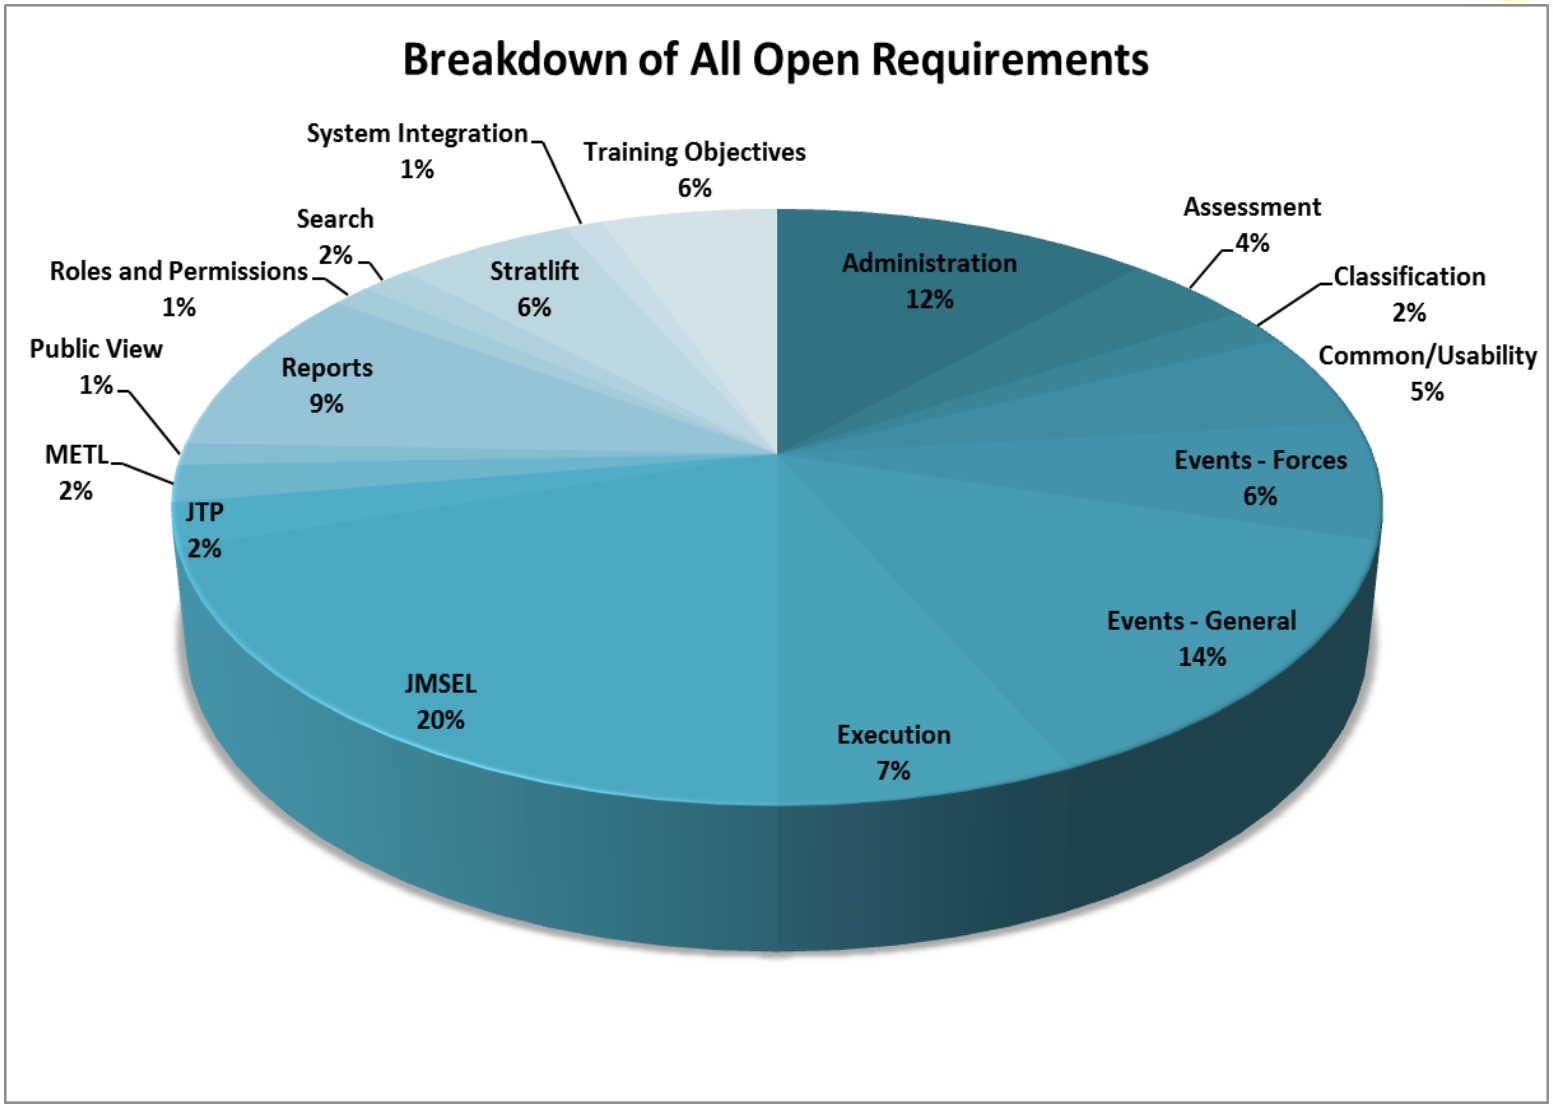
Functional Enhancements



Architecture Enhancements

Open requirements will be worked into each software release while implementing strategic initiatives.

Breakdown of All Open 250 Requirements



v7.2 Design Concept Review

JTIMS v7.2 Requirements

Summary

JTIMS0680	Allow users the ability to add hyperlink bookmarks in the Events Module. This information should be available in the Event Summary so public users can access the website to obtain additional supporting event data.
JTIMS1108	Modify the order of the Execution sub-actions: CMP, OCT, CSR, etc & add mouse over text
JTIMS1284	Add Inject #, Observer info, and DTG to OCF. Provide more space between the fields for the user to add details.
JTIMS1285	Provide the ability for the user to generate a batch Observation Collection Form (OCF) report for each Event. The user should have the ability to generate the OCF report for 1, many, or all TOs associated to the Event.
JTIMS1401	Display Force Requestor/Force Provider Contact Information. Include comments where available for those statuses as well.
JTIMS1432	Update the TPO/TPE Report to include the Inject #'s linked/associated with each Training Objective. Provide the ability to generate a TPO or TPE separately in addition to updating the existing TPO/TPE report. All reports should include the Inject #'s linked/associated with each Training Objective and should also indicate which Training Objectives have TPOs completed, TPEs completed and which do not - i.e. "No Data"
JTIMS1540	Provide a query capability that would allow a Force Provider the ability to search for (filter) and generate JTIMS force sourcing data. This report should display the Change Log for a Range of Force Requests within an exercise or selected exercises. Right now they have to generate the history individually with each force request line item. An unformatted XLS report of this data would provide Providers data to conduct analysis such as Lead Times for Sending, Acknowledging, and Sourcing.

JTIMS v7.2 Requirements

Summary

JTIMS1542	JTIMS Lite: Provide the ability to edit imported Training Objectives.
JTIMS1668	Link inject numbers associated to TPO's. When a user creates a TPO for a Training Objective, the system should display all the linked inject numbers.
JTIMS1675	Remove the link between HITRs and METs. Currently in JTIMS, when users create HITRs, they have the ability to link it to a task from the UJTL task library or to a MET within the user groups METL. When users choose to link it to a MET, the system is associating that data to that specific MET. When changes are made in DRRS to that MET and perpetuated to JTIMS, the corresponding HITR data in JTIMS is affected. When creating HITRs, the data should NOT be tied to the METL, instead HITRs should be linked to a task. Users should continue to be able to use the JTIMS METL to find the MET they need but once selected, the system should not reference the MET - but instead should reference the corresponding Task information only.
JTIMS1678	Command Force Providers should be able to delegate force requests sent to their Command to their subcomponents for sourcing. The commands have a requirement to "send" force requirements to their components to source...vs. having the components log into the commands organization.

JTIMS #0680

Event Summary

(U) COBRA GOLD 08

Event Details Report | Register as a Point of Contact | View all Points of Contact

Status	Unpublished
Short Description	(U) U.S./Thai combined/joint, air, land, maritime, amphibious, and special operations exercise.
Purpose	(U) COBRA GOLD is designed to improve US/Thai combat readiness and combined/joint interoperability while enhancing security relations and demonstrating U.S. resolve to support security and humanitarian interests of friends and allies in the region.
Remarks	(U)

Name
Description
Significant Military Exercise Brief (SMEB)
The SMEB is a standard notification of Event related information. This report will be generated for a selected event. The bold text is populated with JTIMS data related to the selected event.
SMEB Summary Report
This report is a summary of the event details and user responses associated with determining whether a SMEB briefing is required for an Event.
SMEB Executive Overview
2
This report includes SME related data and is generated to provide advance notification of Significan Military Events
Events Exempt From SMEB Report
3
This report is a summary of events and the associated SMEB question(s) that make the event exempt from a Significant Millitary Exercise Brief (SMEB).
5W's Report
This report is a summary of the event(s) used to provide a high-level overview of the event at conferences and planning meetings
Conference Report
This report provides details for the current event to be used for scheduling conferences. The report includes a list of event location (s), force provider and transportation provider details.
Event Details Report
This report provides details for the current event. The report contains more data than the conference report to include the event narrative, linked events and training objectives.
View All Training Objectives Report (formatted)
This report displays all Training Objectives associated with the current event in a formatted Excel spreadsheet.
View All Training Objectives Report (Unformatted)
This report displays all Training Objectvies associated with the current event in an unformatted Excel spreadsheet.
View All Training Objectives Linked From an Event
This report displays all Training Objectives linked from the current event in an unformatted Excel spreadsheet.
View All Training Objectives Linked From To an Event
This report displays all Training Objectives linked to the current event in an unformatted Excel spreadsheet.
Training Objective Count
This report displays all Training Objectives counts for each MET associated with the selected event.
Exercise Force Change Log
This report displays all change log data for the force/participants requirements for the current event in an unformatted Excel spreadsheet

Security Classification

— Use the JTIMS Classification Module to portion mark JTIMS data.

Force Requirements

- Joint vs Service Events
  - — Joint Events will display Joint Force Providers
  - — Service Training Events will display the Service Force Providers (FORSCOM, ACC, FFC, MARFORCOM)
- Subordinate Force Requests
  - – Identify a Force Provider – when submitted these are sent to the higher headquarters for further review/processing to the Force Provider.
- Subordinate Force Requests
  - – Identify a Force Provider – when submitted these are sent to the higher headquarters for further review/processing to the Force Provider.
- Joint Staff Force Requests
  - – JS J3 – selected for all JS J3 force sourcing requirements
  - – JS J7 – selected when Joint Staff Directorate participation is required (J1, J2, J4, J5, J7, J8)

UNCLASSIFIED

JTIMS-JMSEL

Version 7.1.0

Enhancements and Issues

This presentation is
UNCLASSIFIED

Mr. Dave Coombs,
USSTRATCOM/J73, Joint Plans and After Action Division

UNCLASSIFIED

JTIMS-JMSEL—Pros…

- **Part of the JTIMS suite—a one stop shop for almost all of your JELC requirements.**
  - **JMETs are real-time, current with the DRRS database.**
  - **Current Training Objectives easily inserted, created, or linked from the JTP—no copy and paste over—full version of TOs displayed.**
- **All the fields and features of the Version 2.6 stand-alone and then some….**
  - **Summary View feature can display all MSELs associated with a given: Training Objective, Theme, JMET, or Storyline.**
  - **Manage Scenario function now allows quick access back to the actual database (via JMSEL Overview)**

JTIMS-JMSEL—Pros; continued…

- Can now navigate easily from one common display (Calendar, Concept Map, Status Report, etc.) to another without having to first return to JMSEL Overview.

JTIMS-JMSEL—Issues….

- **Needs to be evaluated on a large database with 1000+ (eg, Terminal Fury) records or more.**
  - **Reassure COCOM staffs that program will rapidly process and display data.**
  - **Will the program slow down if multiple COCOMs are accessing multiple scenarios simultaneously?**
- **Joint Staff needs to specify and guarantee recall and repair times, if the JTIMS server(s) go offline during a major exercise.**
- **Not yet available on SIPRnet on a REL server.**
  - **COCOMs cannot have allies directly participate in MSEL development**

JTIMS JMSEL Strategic Migration

Discussion

- Phase in JTIMS JMSEL Enterprise
- Maintain JMSEL Legacy (2.6) in place until such time that JTIMS JMSEL has demonstrated a definitive success
- Funding for legacy v2.6 comes out of the overall JTIMS budget (CE2 dollars)
- Merging JMSEL is directed in the JS IT Assessment

Way ahead

- Migrate legacy JMSEL v2.6 exercises
- Develop a rigorous JTIMS JMSEL Test Plan
- Test/validate in medium/large scale exercise (side-by-side)

End State

- Retire legacy JMSEL v2.6 when stakeholders concur with migration test results.

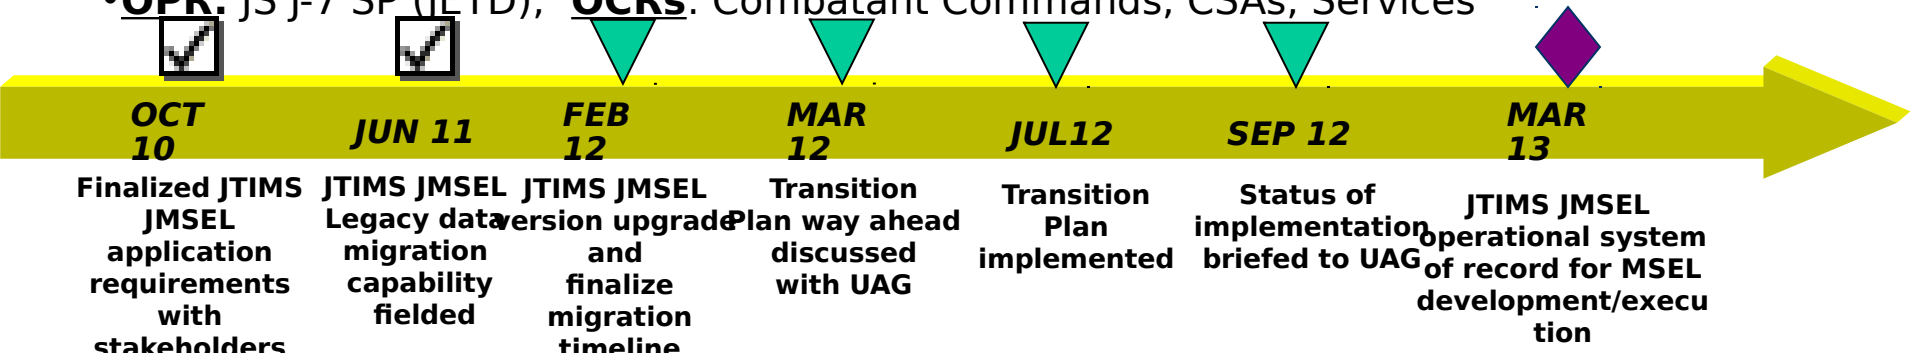
Issue Review

- ***10-012 – JTIMS JMSEL***

Joint Training Information Management System (JTIMS) Joint Master Scenario Event List (JMSEL)

Initiated 22 Sep 10 **Briefer: LTC Ray** **Updated 23 Feb 12**

- **Issue 10-012:** Transition from legacy JMSEL v2.6 to JTIMS JMSEL Enterprise contingent upon system reliability and functionality.
- **Discussion**: Transition plan discussed during JTIMS UAG, WJTSC 10-2. Legacy JMSEL v2.6 data migration to JTIMS JMSEL (Enterprise); enhanced system availability and support; and costs associated with maintaining a separate JMSEL standalone environment. All commands and Combat Support Agencies agree that community needs to migrate to JTIMS JMSEL (Enterprise) but some expressed concerns that supporting organizations rely heavily on JMSEL v2.6.
- **Endstate:** Complete data migration from legacy JMSEL v2.6 to JTIMS JMSEL (Enterprise); JTIMS failover and backup capabilities deployed, tested and validated; JTIMS JMSEL application enhancements developed and deployed in FY11; and a timeline established, in coordination with commands/agencies, for shut down legacy JMSEL v2.6.
- **POA&M:** JS J-7 develop a timeline and plan to import legacy JMSEL v2.6 data into JTIMS JMSEL (Enterprise); complete hardware/architecture improvements, and complete deployment of JTIMS JMSEL application enhancements in FY12 . Conduct JTIMS JMSEL transition planning and training with stakeholders.
- **OPR:** JS J-7 SP (JETD); **OCRs**: Combatant Commands, CSAs, Services



OCT 10
Finalized JTIMS JMSEL application requirements with stakeholders
JUN 11
JTIMS JMSEL Legacy data migration capability fielded
FEB 12
JTIMS JMSEL version upgrade and finalize migration timeline
MAR 12
Transition Plan way ahead discussed with UAG
JUL12
Transition Plan implemented
SEP 12
Status of implementation briefed to UAG
MAR 13
JTIMS JMSEL operational system of record for MSEL development/execution

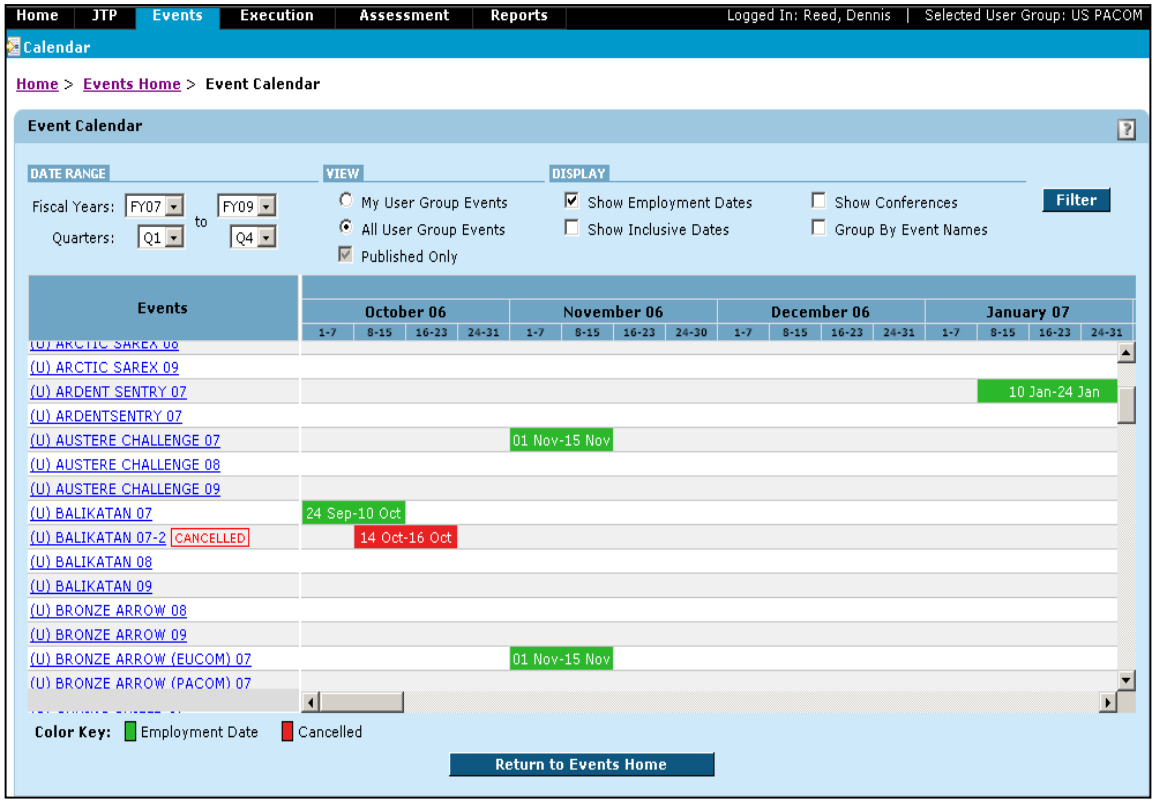
JTIMS Point of Contacts

LTC Daniel Ray
JTIMS Program Manager
Joint Staff J-7
Office: (703) 697-1133
DSN: 227-1133
NIPR: daniel.ray@js.pentagon.mil
SIPR: daniel.ray@js.smil.mil

Ms Jane Ward
Joint Staff J-7
Office: (703) 693-4015
DSN: 223-4015
NIPR: jane.ward@js.pentagon.mil
SIPR: jane.ward@js.smil.mil

Mr. Mark Cooney
Joint Staff J-7
Office: (703) 614-8161
DSN: 224-8161
NIPR: mark.cooney@js.pentagon.mil
SIPR: mark.cooney@js.smil.mil

Mr. Joseph Mazon
Joint Staff J-7
Office: (571) 256-4648
DSN: 260-4648
NIPR: joseph.mazon@js.pentagon.mil
SIPR: joseph.mazon@js.smil.mil



Support/ Configuration Management
